## **Non-Final Office Action**

Claims 1-4, and 7 -20 are pending.

## Claim Rejections - 35 USC § 103—1st Rejection

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or

described as set forth in section 102 of this title, if the differences between the subject

matter sought to be patented and the prior art are such that the subject matter as a whole

would have been obvious at the time the invention was made to a person having ordinary

skill in the art to which said subject matter pertains. Patentability shall not be negatived

by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1612

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-4, 7-9, 11, 12, 14, 16, 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over OMURA et al. <sup>1</sup>.

The reference teaches avermectin derivatives having high antiparasitic activity, which embraces Applicant's claimed invention. See the entire document especially formula (1) and lines 1-67 in col. 1, lines 1-58 in column 2, Tables 1-8 in column 37-45; examples and claims. The reference teaches avermectin derivatives of formula (I) having higher antiparasitic activity, which have high antiparasitic activity. The carbon atom at the 4"-position represents a single or double bond; a line ---- between R2 and a carbon atom at the 5-position represents a single or double bond. See lines 58-61 in column 1.

Instant claims differ from the reference in that they are of different generic scope. Specific compound are disclosed in present application for example see Tables 9 and 10 on pages 76 and 77. See lines 1-67 in column 1 and lines 1-58 in column 2, examples and claims.

<sup>1</sup> US Patent 6.605.595 B1

It had been held by Courts that the indiscriminate selection of "some" from among "many" is considered prima facie obvious. <u>In re Lemin</u>, 141 USPQ 814 (1964); <u>National Distillers and Chem. Corp. V. Brenner</u>, 156 USPQ 163.

The instant claimed compounds would have been obvious because one skilled in the art would have been motivated to prepare compounds embraced by the genus of the above cited references with the expectation of obtaining additional beneficial compounds for the same use such as pesticides. The instant claimed compounds would have been suggested to one skilled in the art at the time of invention was made.

Instant claims are broader than the prior art.

One having ordinary skill in the art would have been motivated to select the claimed compounds from the genus in the reference since such compounds would have been suggested by the reference as a whole. It has been held that a prior art disclosed genus of useful compounds is sufficient to render prima facie obvious a species falling within the genus. In re Susi, 440 F.2d 442, 445, 169 USPQ 423, 425 (CCPA 1971), followed by the Federal Circuit in Merck & Co. V. Biocraft Laboratories, 874 F.2d 804, 10 USPQ 2d 1843, 1846 (Fed. Cir. 1989).

In absence of any criticality and/or unexpected results presently claimed invention is considered obvious.

Art Unit: 1612

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that

the subject matter defined by the instant claims would have been obvious within the

meaning of 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 103—2<sup>nd</sup> Rejection

Claims 1-4, 7 and 8-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over

BANKS, Joseph<sup>2</sup>. See the entire document especially abstract of the invention, compounds of

formula (I) on page 2, lines 4-12 on page 4, lines 4-25 on page 5 examples 1-23 and claims.

Instant claims differ from the reference in that they are of different generic scope.

Specific compound are disclosed in present application for example see Tables 9 and 10 on

pages 76 and 77. See lines 1-67 in column 1 and lines 1-58 in column 2, examples and claims.

It had been held by Courts that the indiscriminate selection of "some" from among

"many" is considered prima facie obvious. In re Lemin, 141 USPQ 814 (1964); National

Distillers and Chem. Corp. V. Brenner, 156 USPQ 163.

The instant claimed compounds would have been obvious because one skilled in the art

would have been motivated to prepare compounds embraced by the genus of the above cited

references with the expectation of obtaining additional beneficial compounds for the same use

such as pesticides. The instant claimed compounds would have been suggested to one skilled in

the art at the time of invention was made.

Instant claims are broader than the prior art and are generically taught.

<sup>2</sup> WO 93/15099

•

One having ordinary skill in the art would have been motivated to select the claimed compounds from the genus in the reference since such compounds would have been suggested by the reference as a whole. It has been held that a prior art disclosed genus of useful compounds is sufficient to render prima facie obvious a species falling within the genus. <u>In resulting</u> Susi, 440 F.2d 442, 445, 169 USPQ 423, 425 (CCPA 1971), followed by the <u>Federal Circuit in</u> Merck & Co. V. Biocraft Laboratories, 874 F.2d 804, 10 USPQ 2d 1843, 1846 (Fed. Cir. 1989).

In absence of any criticality and/or unexpected results presently claimed invention is considered obvious.

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that the subject matter defined by the instant claims would have been obvious within the meaning of 35 U.S.C. 103(a).

## **Response to Remarks**

- A. Examiner respectfully disagree that OMURA does not teach single bond between R1 and 4", the reference teaches that "The carbon atom at the 4"-position represents a single or double bond; a line ---- between R2 and a carbon atom at the 5-position represents a single or double bond", see lines 58-61 in column 1.
- B. Arguments are found persuasive because OMURA does not teach monosaccharide group at C-13 position therefore claims 10, 13, 15 and 17 are not obvious over OMARA et al.

Art Unit: 1612

Applicant's arguments on OMURA et al. were fully considered but are not found persuasive therefore the rejection is maintained.

- C. Applicant argues that OMURA teaches a single CH2, claims 12 and 13 require at least two carbon chains and claims 11, 17, 18 and 20 require at least a three carbon chains. Examiner disagrees because in case when CH2 is taught ethyl and propyl groups are considered obvious due to homologues. Further Applicant argues that OMURA does not teach alkene group as claimed in claims 17, 18 and 20. Examiner disagrees because the reference teaches alkene.
- D. Applicant argues that OMURA teaches a single CH2 and does not teach R1 as CH2-OH or CH2-CH2-OH therefore claim 19 is not obvious over OMURA. Examiner agrees.
- E. In order to advance the prosecution Applicant may consider calling the Examiner to discuss the issues surrounding this application.
- F. Finality of the rejection is withdrawn.

## **Communication**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sabiha Qazi whose telephone number is (571) 272-0622. The examiner can normally be reached on any business day except Wednesday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Krass Frederick can be reached on (571) 272-0580. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1612

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
